ishikachaudhary21

Summary

Full Stack Developer specializing in Python, AI/ML, and scalable application development with expertise in Django, Django REST Framework, Flutter, and React. Experienced in building production-ready AI systems, real-time video analytics, and computer vision solutions using YOLO, PyTorch, and TensorFlow. Skilled in custom model training, LLM integration, RAG-based AI chatbots, RESTful APIs, and end-to-end backend development. Strong background in developing cross-platform mobile applications, optimizing system performance, and delivering scalable, high-impact software solutions in Agile environments.

Skills

PROGRAMMING LANGUAGES:	Python, JavaScript, Dart, Flutter, HTML5, CSS3
FRAMEWORKS & BACKEND:	Django, Django REST Framework, Firebase, FastAPI, RESTful APIs
MACHINE LEARNING & AI:	TensorFlow, PyTorch, YOLO, Deep Learning, Scikit-learn, CUDA
DATABASES:	MySQL, PostgreSQL, Firebase Realtime Database
TOOLS & TECHNOLOGIES:	Git, GitHub, Postman, Docker, Linux, Postman, SSH, RTSP/MJPEG Streaming

Professional Experience

Oodles Technologies | Software Developer **March 2025 – Present**

- Architected and developed a scalable **AI-driven PPE Detection**, **People** and **Vehicle** Counting Monitoring System using Python, **Django**, and **REST APIs**, enabling secure camera discovery, SSH tunneling, geofenced zone tracking, and real-time RTSP/MJPEG video streaming with 24×7 industrial monitoring.
- Trained and deployed custom **YOLOv11 deep learning computer vision models** using **PyTorch** and **CUDA** on 10,000+ labeled images for PPE detection, people occupancy analytics, and vehicle monitoring with low-latency real-time AI inference.
- Implemented **polygon-based geofencing**, real-time occupancy counting, and directional vehicle line-crossing analytics using **ByteTrack**, **OpenCV**, and **Shapely** for live industrial monitoring workflows.
- Built **Body Morph**, an AI-powered fitness application using **Django**, **TensorFlow**, and **YOLO**, achieving 92% food recognition accuracy and improving user tracking efficiency by **65%**.
- Developed secure **RESTful APIs** and **microservices** with **Google Generative AI** to deliver personalized nutrition and workout recommendations, increasing user engagement by **40%** and retention by **25%**.
- Developed **AbeyO**, a **Flutter-based** social event app with Google Maps integration, reducing event planning time by 30% and increasing RSVP rates by **45%.**
- **Built Eat Well Tracker** using **Flutter** and **Firebase**, improving daily active users by **28%** through smart reminders and intuitive **tracking** features.

Tata Motors | Trainee Flutter Developer **Aug 2024 – Oct 2024**

- Led frontend and backend development of mobile apps using Flutter, driving project success.
- Enhanced website interfaces with dynamic HTML and CSS design.

Projects

PPE Monitoring Platform | *Django REST-Framework, LLM (Google Generative AI, YOLO, AI model training, Video Streaming)*

- **Designed and developed an end-to-end PPE Monitoring System** using Django and REST APIs, enabling automated camera discovery, secure SSH tunneling, real-time RTSP/MJPEG streaming
- **Trained and deployed a custom YOLO-based PPE detection model** (YOLOv11) on 10,000+ labeled industrial images to detect PPE categories.

AbeyO Application | *Flutter, Dart, API Integration*

- Contributed in developing a multi-city event networking app using **Flutter and Dart**, streamlining event creation workflows and reducing planning time, responsive UI/UX for host and guest interactions, increasing RSVP response rates by 45%.
- Implemented **real-time API integration** with dynamic data updates, smart notifications, and location tagging via **Google Maps**, achieving **delivery reliability** and enhancing user coordination.

Eat Well Tracker| *Flutter, Dart, Firebase*

- Developed a daily wellness tracking app using **Flutter and Firebase** enabling food, water, and weight logging with **real-time sync** and intuitive dashboards.
- Implemented **personalized reminders and intake history tracking**, leading to a **28% increase in daily active users** and a **25% improvement in user goal completion rates**.

Education

Masters in Computer Applications | JIMS, Jagannath University, Delhi **2023-2025**
Percentage Marks: 75.6%

Bachelors of Science, Computer Science (Hons.) | University of Delhi, Delhi ***2020-2023***
Cumulative CGPA: 8.595/10.0 (81.65%)

Achievements

- Awarded "Project of the Month" at Oodles Technologies for outstanding contribution to the **AI-powered PPE Monitoring System**.
- Research Paper Published – Multilingual Handwritten Text Recognition using Deep Learning and Generative AI, featured in the ***Journal of Information Systems & Computer Management*.**
